PROFI

**LIMITED
1000
EDITION**

NOCH Gras-Master 3.0 PROFİ – Now Uniquely Available in the ‘Limited Edition’!

60115 **Gras-Master 3.0 PROFİ ‘Limited Edition’**

NEW

- Gras-Master 3.0 PROFİ
- counter-pole with crocodile clip
- 2 grass stamps (large and small)
- 3 sieves for flocking with grass fibres of different lengths
- 1 adhesive tray

Expected release: November 2024

The ‘Limited Edition’ offers enthusiasts of electrostatic flocking an ‘all-inclusive package’. It includes a Gras-Master 3.0 PROFİ limited to 1000 units, featuring a yellow flock container. Thanks to the included grass stamps, entirely new, previously unattained results can be achieved.

The NOCH Gras-Master 3.0 PROFİ was developed to meet the highest demands of model-building professionals. With a power output of up to 16kV, it electrostatically charges the Grass Fibres. Depending on the length of the grass, one of the three included sieves (fine, medium, or coarse) is used. Together with NOCH grass fibres and NOCH Grass Glue (ref. 61130 or 61131), lush meadows, grass areas, pastures, fields, ornamental lawns and much more can be created super-realistically.

First, apply the specially developed NOCH Grass Glue to the surface, fill the desired grass fibres into the container of the Gras-Master 3.0 PROFİ, screw on the appropriate sieve, and connect the counter-pole

cable to the ground to intensify the effect. Then you're ready to go. In no time, the model meadow of your dreams will emerge!

The set also includes two Grass Stamps and an adhesive tray. Fill this tray with NOCH Grass Glue and dip the desired stamp into it. The adhesive adheres to the flexible nubs and can be stamped onto a prepared surface. Afterwards, Grass Fibres can be applied using the Gras-Master 3.0 PROFİ. This creates a patchy grass area. Additional Grass Fibres can be applied to this using the same technique, resulting in entirely new, realistic effects.

Power is supplied by eight 1.5V AA batteries (not included), which guarantee an operating time of approximately 10 to 12 hours. A red LED indicates that the device is in operation.

G 1 0 H O T T N Z

NOCH Gras-Master 3.0 PROFI 'Limited Edition' Highlights

Video-Clip

- professional device for the highest demands
- up to 16 kV output
- including three sieves (fine, medium and coarse)
- including two grass stamps (large and small) and adhesive tray
- exclusive 'Limited Edition' with yellow flock container
- limited to 1000 pieces

Handicraft tip:
Gras-Master

The ground to be flocked with grass is coated with special NOCH Grass Glue (ref. 61130 or 61131).

The grass fibres are loaded into the Gras-Master drum. Different lengths and colours can thus be mixed together.

The crocodile clip (counter-pole) is fastened near the surface where the grass is to be applied. Due to the electrostatic charge, the grass fibres stand vertically in the glue bed.

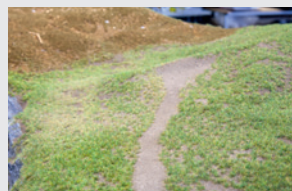

The NOCH Grass Stamp can be used to create uneven tufted grassing.

The stamp is carefully pressed into the adhesive and the adhesive is then applied to the surface in dots.

Once the first gluing points have been set, the fibres can be applied with the Gras-Master.

After vacuuming off the first layer, the short grasses form a nice patchy base which can be built on.

NOCH Master Trees

NEW

The NOCH Master Tree series represents the highest quality in model making. Each tree is handcrafted from up to 40 wires, creating a flexible skeleton that is subsequently coloured and adorned with foliage. Due to the individual manufacturing process, each tree is unique and serves as an eye-catching feature for sophisticated model railway layouts and dioramas. The trees shown here expand the popular series with new variants.

Expected release: January 2025

Note: NOCH Master Trees are not only ideal for model railway enthusiasts of all gauges but also for creating bases, dioramas, and landscapes. The sizes are particularly interesting for military modeling scales 1:35, 1:48, and 1:72. They are also suitable for car modellers working in scales 1:24, 1:32, and 1:45.

Info Tip:

Master Trees are made of twisted white wire. You can therefore also change the shape of the finished tree afterwards.

What is special about AMMO Rail Center colours

NEW

AMMO Rail Center products not only provide you with high-quality colours, but you will be enabled to use them optimally. From the primer to the realistic weathering effect - the Rail Center tutorials, brochures and books guide you step by step through the entire process and teach you valuable skills. Transform your models into photorealistic masterpieces.

With AMMO Rail Center colours, every detail of your model railway comes to life!

Expected release: October 2024

* AMMO Rail Center products are distributed throughout Europe via NOCH specialised dealers except in BeNeLux.

SOLUTION BOX – The “all-in-one package”

Discover the world of perfect model railway colouring. Whether repainting, ageing and weathering or the application of certain effects: With AMMO Rail Center colours, you not only have the right product at hand, but also get the right processing instructions and tutorials. This allows you to safely transform your valuable models and add further highly realistic details to your model railway.

Special SOLUTION BOXES as comprehensive “all-in-one packages” for modelling enthusiasts have been developed:

- Precisely coordinated colours and weathering products
- High-quality brushes for detailed work
- SOLUTION BOOK: Manual with step-by-step instructions

Please find all SOLUTION BOXES on page 14.

SOLUTION BOOK – We won't leave you alone!

The innovative SOLUTION BOOK guides you through every step with intuitive, symbol-based instructions.

This allows you to achieve professional results effortlessly, regardless of whether you are a beginner or an experienced modeller. From primer and base colours to special weathering effects such as rust, dust and oil stains – the comprehensive system leaves nothing to be desired. Experience the AMMO Rail Center quality!

Features:

- Precisely matched to the application, e.g. German trains and locomotives
- Versatile use for all scales
- Efficient techniques for amazing results explained in detail

Please find all SOLUTION BOOKS on page 13.

**Sebb's
1zu87**

Info-Box:
Practical Tips from the Pro

Sebastian Mühlbach is a passionate model railroader and owner of the YouTube channel "Sebbs1zu87". With his expertise in the colour aging of locomotives and wagons, he shares valuable tips and techniques that he has gathered over the years. His goal is to make it easier for others to enter the world of patination and inspire them to elevate their models to a new level in

terms of colour. On the NOCH YouTube channel, you can now find a brand-new video by Sebastian Mühlbach, in which he demonstrates the use of various AMMO Rail Center products. It's worth checking out at www.noch.de/sebbs-modellbahn-video or scan the QR code with your smartphone.

Rail Center Acrylic Paints

NEW

The specially developed colour palette from AMMO Rail Center offers authentic colours for locomotives, carriages and accessories of the most the world's best-known railway companies. Easy to apply with brush or airbrush, the colours impress with their excellent opacity and an even finish. Durable and versatile applicable – Rail Center turns your model railway into a masterpiece!
